New orders to DYNASAFE

Dynasafe AB in Karlskoga has during the last six weeks received 6 new orders from customers with a total value of more than 15 MSEK. For Dynasafe, this means increased demand and a continuous high order stock.

European customers and a Japanese customer have ordered different versions of bomb chambers and an engineering order. All products will be produced locally in the regions of Värmland and Närke by partners to Dynasafe.

Despite the existing recession Dynasafe AB experience a continuous strong demand for its products and forecast an increase in both order intake and turnover for next year.

Dynasafe holds a leading market position within the segments for advanced bomb containment chambers and technology for safe destruction of munitions. The basis for this strong market position is the Dynasafe products which are built on in-house competence and in-house technology.
