New orders for bomb protection equipment to DYNASAFE AB

Dynasafe AB in Sweden has recently received several new orders for bomb chambers with a total order value of approx. 18 MSEK. Customers in Japan, China, Lithuania, Middle East and USA have chosen to place their orders with Dynasafe.

A broad geographical distribution is an evidence of a strong market position and competitive strength in several parts of the world. The Research and Development activity in Dynasafe has been a first class activity over the last 10 years and Dynasafe has during this period been a technology forerunner in several fields.

Dynasafe will continue to increase the number of employees due to the high order intake. During 2009, the number of employees increased by approximately 20%.

Dynasafe has managed to win a large number of contracts this year and the total order intake during 2009 is more than 180 MSEK. This is a strong increase compared to last year and will generate a significant increase in turnover for 2009 from previous year.

Dynasafe is the market leader in design and manufacturing of advanced bomb chambers along with safe and environmental friendly technology for destruction of munitions. The market position of Dynasafe is built on the Dynasafe technology, the in-house engineering, the appetite to design new products and the extensive experience to design and deliver high quality products.
