

Product Information PSV

Portable explosion Suppression Vessel

The **PSV** series is designed to suppress the effects of an explosion of a suspect object while waiting for EOD experts or during its removal to a safer location. The PSV's provide protection against fragments and suppresses the direct effects from the blast wave. The PSV's are offered made in different sizes depending on the size of the object to be placed inside.

The PSV's are used by personnel at Airports, Train stations or other public facilities for safe and quick removal and containment of a suspect objects.

The small PSV's are easy to operate manually and the large PSV's by electric control buttons. The large openings makes the PSV's easy to load. The PSV's is mounted on wheeled carts or special wheeled frames, which in combination with the limited weight make the PSV's easy to move also inside buildings.
