DYNASAFE introduces bombproof litterbin

Dynasafe AB has developed a bombproof litterbin to increase safety at airports, railway stations, sport arenas and other public places. This is the latest in a vast number of product developments that Dynasafe now is putting on the international market place. The bombproof litterbin has an attractive and modern design is simple to empty, and has a high dampening capacity proven in actual tests at Bofors Test Center in Karlskoga.

The development has been in cooperation with the Danish company Peoples to enable the market demand of a litter bin with high technical performance as well as an attractive design.

During the first quarter of 2007 the first units have been delivered to a European company.

- Our technical solution, the attractive and user friendly design was the key elements for our customer choosing Dynasafe as a supplier. It is very satisfying that the customer is a European bank, with a high degree of knowledge and safety process for their daily operation, that placed the order with us says Ulf Green, MD at Dynasafe AB.

For more information please contact Ulf Green, tel office: +46586-771271, Cell +46 70-3391271
