

Dynasafe Demil Systems AB and Dynasafe Protection Systems AB certified according to ISO 9001:2008

Dynasafe Demil Systems AB and Dynasafe Protection Systems AB are now formalizing and further strengthening their focus on quality and safety in the development of solutions for explosion containment and munitions destruction. The companies have recently received their ISO 9001:2008 quality certificates by the accredited certification body Intertek.

Dynasafe offers a comprehensive product range for explosion containment and munitions destruction, including related environmental solutions and services, to customers worldwide. The total order value for 2011 exceeded 250 MSEK.

Jörgen Björkman, MD for Dynasafe Protection Systems and Dynasafe Demil Systems, points out that Dynasafe has always had the emphasis on quality, performance, safety and environment. "The quality of our products and services shall be a main reason to choose Dynasafe solutions. The companies continue to grow, and to keep the good structure and steering we are now further sharpening the routines for continuous improvements, through target setting, follow-up and actions. The ISO-certification is part of this work", he explains.

With the ISO-certificates, Dynasafe Demil Systems and Dynasafe Protection Systems are well positioned to continue to drive the development within their business areas.

About Dynasafe

Dynasafe Protection Systems has world-leading technology for protection against the effects of explosions. Best-sellers are gas-tight explosion containment chambers mounted on trailer, integrated in vehicles or as radio controlled units, but Dynasafe Protection Systems also develop sophisticated, integrated systems for safe explosive ordnance disposal.

Dynasafe Demil Systems are the technology development frontrunners for solutions for safe destruction of conventional and chemical munitions. The product range include everything from key machinery, dismantling equipment, and small mobile units, to large-scale plants capable of handling both conventional and chemical munitions, from small arms to large calibres, as well as related services.

Dynasafe Protection Systems and Dynasafe Demil Systems, with head offices in Karlskoga since the establishment in 1991, together form Dynasafe International since 2011. Together with the sister group Dynasafe Area Clearance Group, Dynasafe offer a complete toolbox for explosion protection, munitions destruction, demining, explosive ordnance disposal (EOD), damage prevention and related environmental solutions.
