

Make your world a safer place

The Dynasafe Group is an international organisation specialising in the removal and management of UXO (unexploded ordnance), CBRNe (Chemical, Biological, Radiological, Nuclear, explosives) and other hazardous materials. Dynasafe has over twenty years of experience operating in regions affected by land mines, unexploded ordnance or terrorist activity. We have the expertise to deliver disposal and protection systems as one integrated solution. Our products make your world a safer place.

Dynasafe – Safeguard Your Future

The Dynasafe Group is a world leader in CBRNe risk mitigation with proven international experience. We provide three primary services:

- **Area Clearance** - UXO/demining on land and under water.
- **Demilitarisation** - conventional/chemical munitions destruction.
- **Protection** - EOD systems, bomb disposal and explosion protection.

Dynasafe is the only organisation capable of surveying, locating, clearing, containing, transporting and disposing of CBRNe material.

Experience You Can Trust

- More than 1000 UXO and demining projects worldwide.
- Over 20 chemical and conventional demilitarisation plants deployed.
- More than 100 years of accumulated experience operating disposal plants.
- Over 250 containment chambers & integrated protection systems delivered to date.

Global presence for over twenty years in:
Area Clearance
Demilitarisation
Protection

Area Clearance

Dynasafe Area Clearance - with its origins in the recognised market leaders *BACTEC International Ltd* and *GRV LUTHE Kampfmittelbeseitigung GmbH* - is the provider of choice for UXO risk mitigation and mine clearance:

- International experience.
- Clearance on land and under water.
- Services include consulting, investigation, detection, risk assessment, training, project management, site support and third party quality assurance.
- Over 1000 successful UXO/demining projects worldwide.

BACTEC International Ltd has provided unexploded ordnance, mine clearance and bomb disposal services internationally since 1991 and successfully completed UXO disposal contracts in over 49 countries.

Founded in 1991, *GRV LUTHE Kampfmittelbeseitigung GmbH* specialises in identifying and clearing conventional explosive ordnance. Following the unification of Germany, GRV successfully dismantled border fortifications, detecting and clearing mines from the former East/West border – an area stretching over 300km.

Demilitarisation

Dynasafe Demil Systems (*Dynasafe Demil Systems AB, Dynasafe Germany GmbH, Dynasafe Sales & Operations GmbH*) design, build and operate plants for the safe and environmental friendly disposal of conventional and chemical munitions.

- Wide range of munitions can be treated.
- Stationary and mobile plants together with off-gas treatment.
- Over 20 plants for chemical and conventional munitions deployed.
- More than 100 years operational experience.
- Accident free record.
- Destroyed munitions guaranteed to be free of explosives and organic material.
- Delivery of disassembly systems and stand alone environmental solutions.

Environmental Safety

Compliance with environmental regulations and the safety of workers are our highest priorities. Our solutions are designed to eliminate harmful substances emitted during the disposal processes. System components can be monitored and controlled remotely from a safe working distance.

Protection

Dynasafe Protection Systems are world-renowned suppliers of integrated protection systems, explosive containment vessels and scenario-based consulting and training. Our products are designed for the handling and total containment of various CBRNe hazards such as: fragments, pressure, temperature and toxic materials. Our trainers are EOD specialists still actively involved in their field of expertise.

Dynasafe products feature:

- Gastight and non gastight containment.
- Integrated systems.
- Scenario-based tailored solutions.

Dynasafe Protection Systems have implemented over 250 units/systems worldwide.

Customer Segments:

- **Defense:** integrated solutions with large blast containment capacity for harsh environments.
- **Law Enforcement:** reliable and user-friendly integrated solutions for quick response.
- **Airport Security:** large luggage size containment capacity and integration with BHS systems.
- **Public Security:** preventive protection against bomb threats or terror attacks in crowded spaces.
- **Industry & Research:** tailored solutions based on toxicology and explosive safety research.
